

# ELR Software Pty Ltd

ELR Software produces a range of computer programs designed by speech pathologists for speech, language & literacy intervention

Our programs may be used within therapy, to increase efficiency in service delivery using the Internet and CD based materials, and to improve access to the Internet for people with special needs.

We are also available as consultants to clinicians and research projects in the fields of literacy and accessibility issues associated with the Internet.

# EIA

## Enhancing Internet Access

EIA is designed to assist and train people with special needs to use the web. It provides intuitive access to web pages and other public information (eg library catalogs), and is especially suitable for use with a touchscreen. It consists of 3 parts:- the EIA browser, the Internet Tutorial, and the AAP (Awareness and Assessment Protocol).

### Who is it for?

People unfamiliar with and threatened by Internet technology  
People with acquired cognitive and/or physical disabilities  
Useful in rehabilitation, public libraries, disability support environments and for home use

### Features

- ◆ simplified web browser
- ◆ web tutorial
- ◆ assessment tool
- ◆ designed by speech path and OT
- ◆ teaches basic internet concepts
- ◆ uncluttered, user friendly internet access

# Rude Readers

Rude Readers are illustrated, printable eBooks which contain sets of children's "Readers" intended to stimulate humour. They may contain mildly "naughty" words and ideas to interest a child, and reinforce a range of language, phonological, literacy and pragmatic goals. Stories by John Fisher based on his extensive clinical experience at the Royal Children's Hospital, Melbourne.

### Who is it for?

Children - 3 years to 10 years.  
Reinforce pragmatics skills  
Phonemic awareness and early literacy  
Narrative development  
Phonology at text level  
Strengthen syntax skills

### Features

- ◆ light hearted stories attract interest
- ◆ computerised eBook format
- ◆ illustrations highlight speech pathology goals
- ◆ print with color or outline graphics
- ◆ speech pathology targets listed
- ◆ vocabulary analysis
- ◆ LARSP analysis

# Word Meanings

Word Meanings is an interactive language program designed to build understanding and recall of words by strengthening semantic processing. It enables repeated practice and the opportunity for reinforcement of word meanings at an error-free level. Based on the therapy manual Building Language: Word Meanings by Robyn Dower and Jan Mackey's, Helios Art and Book Co, 1996.

### Who is it for?

Adults with dysphasia  
Acquired language disorders  
Cognitive language therapy  
Children with language learning needs  
Strengthen categorization and attention

### Features

- ◆ cognitive neuropsychological approach
- ◆ graded for semantic relatedness
- ◆ everyday vocabulary
- ◆ enables self-paced independent practice
- ◆ feedback and performance record
- ◆ printable results summary
- ◆ accent options (UK, USA, Australia)
